#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-8 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 6,678,882 to Hurley et al. in view of the examiner taking official notice.

As per claims 1, 2, 4, 6, 7 and 19, Hurley discloses receiving a permissions database .....(col. 26, lines 6-10) and generating a package and an identifier (col. 15, line 66 to col. 16, line 8). Hurley et al. do not disclose the remaining features of these claims. The examiner, however, takes official notice that encrypting the package and generating and executable file are well known in the art. It would have been obvious to anyone having an ordinary level of skill in the art at the time the invention was made to have included these features in the system of Hurley et al. since they provide for enhanced security and facility of the system.

As per claims 3, 5 and 8, the examiner further takes official notice that it is also well known to set a password for access to a computer executable file as well as having a package of data which comprises a client software.

### Allowable Subject Matter

Claims 9-18 are allowed.

Claims 20-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 6,012,083 to Savitzky et al.
